

R 120

The perfect fit!

Hobby growers looking to make the most of a single 600-watt grow light need look no further! This new ingenious design provides just over a square meter of growing space, but in rectangular form. Why? Because it's ideally proportioned to exploit every photon from a 600-watt HID grow light housed in a rectangular reflector. The **HOMEbox® Evolution R120** has been tailor-made to create an evenly lit and intensely productive grow space thanks to both its perfect proportions and PAR+ super reflective lining.

An air-cooled reflector can be independently ventilated thanks to the twin 160 mm (6.3") air-ports on either side. A generous 200 mm (8") duct in the roof facilitates easily mountable garden ventilation as well as two 200 mm (8") OmniFlow directable air vents and a 160 mm (6.3") duct for additional active ventilation if required.

- High-tech German design and engineering
- Rugged, plant-safe materials ensures long working life
- All parts are replaceable
- Removable, water-resistant flooring
- Double side access
- **Inlet and outlet tubes:**
 - + 100 mm (4"): 1x right, 1x left, 1x Back
 - + 160 mm (6.3"): 1x right, 2x left
 - + 200 mm (8"): 1x Roof
- **2 x 200mm (8") OmniFlow air vents left and right side**
- 700-micron MicroMesh bug-screen
- Tough canvas outer shell
- **PAR+** super reflective lining promotes faster growth and higher yields
- Super strong 22mm diameter tent poles—stronger plastic corners
- Once closed, unit is entirely sealed and virtually lightproof
- **Total-Blackout Zippers** - no need for Velcro flaps

Assembled size: 120 x 90 x 180 cm

Grow space: 1.08 m²
