

R240

Jumbo crops in any spare room

For growers lucky enough to have a little extra room to dedicate to their hobby, there's really only one way to go: the **HOMEbox® Evolution R240**. Boasting two 300 mm (12") roof inlets, parallel 250 mm (10") air-ports for independent ventilation of air-cooled reflectors and four OmniFlow adjustable air vents, this truly is a powerhouse for the industrious indoor gardener. The R240 can house two or even three 600-watt lamps or two 1000-watt metal halide or high pressure sodium lamps (air-cooled reflectors recommended for 1000-watt lamps). Some growers mix and match lamp types to provide a fuller spectrum to their plants. While there are other large grow tents on the market, what sets the **HOMEbox® Evolution R240** apart is its PAR+ super reflective lining. Multiple high intensity grow lights generate a lot of heat so it's essential that while the all-important PAR energy is reflected towards the plant canopy, the radiant heat is efficiently dissipated. Growers are astounded by both the quantity and quality of their harvest from a **HOMEbox® Evolution R240**. A great choice for the dedicated hobbyist or professional grower.

Assembled size: 240 x 120 x 200 cm

Grow space: 2.88 m²

- High-tech German design and engineering
- Seamless no-trip entry
- Rugged, plant-safe materials ensures long working life
- All parts are replaceable
- Removable, water-resistant flooring
- Double side access
- **Inlet and outlet tubes:**
 - + 100 mm (4"): 1x right, 1x left, 2x Back
 - + 200 mm (8"): 1x right, 1x left
 - + 250 mm (10"): 1x right, 1x left
 - + 300 mm (12"): 2x Roof
- **4 x 250mm (10") OmniFlow air vents 2x Back, 1x left and 1x right**
- 700-micron **MicroMesh** bug-screen
- Tough canvas outer shell
- PAR+ super reflective lining promotes faster growth and higher yields
- Super strong 22mm diameter tent poles—stronger plastic corners
- Once closed, unit is entirely sealed and virtually light proof
- **Total-Blackout Zippers** - no need for Velcro flaps
